MOU with Align Technology

INVISALIGN® UNIVERSITY PROGRAM INDIA

The Invisalign University Program India agreement ("Agreement") shall be effective from 1st October, 2020 ("Effective Date") and sets forth the mutual agreement of Invisalign India LLP ("Align") and DAPM RV Dental College Bangalore ("University") (together the "Parties," and individually a "Party").

Whereas: Align and its affiliates have developed an orthodontic technique utilizing a series of clear polymer, removable appliances, commonly referred to as aligners, that move teeth in small increments from their original state to a more ideal treated state ("Invisalign System"). Align and its affiliates have also developed ClinCheck software, a proprietary system for treating malocclusions, or the misalignment of teeth which depicts the patient's tooth movement from the beginning stage to the final position;

Whereas: University provides specialty training programmes in clinical orthodontics;

Whereas: University desires and Align has offered to provide educational items, services and support as set forth below (the "Invisalign University Program").

The Parties hereby agree as follows:

1. This Agreement will be in effect for one year from the Effective Date of this Agreement.
2. The purpose of this Program is to help educate University residents and faculty about straightening teeth with clear aligner therapy, allow University residents and faculty to evaluate the Invisalign System, and build the clinical confidence of University residents and faculty in understanding how clear aligner therapy may be used in dental practices.
3. The items, services and support provided by Align pursuant to this Agreement are not tied to or based on any past or potential future purchase, lease, recommendation, use, arrangement for purchase, or prescription of Align's products, including "Invisalign" aligners ("Products").
4. University will select the patients required for supervised treatment who are individuals from the wider University student or faculty population who are not family or friends of Invisalign University Program organizers or staff or University residents enrolled in the Masters or PhD Programs, and who provide their written consent as set forth herein ("Program Patients").
5. University must obtain all consents necessary for Program Patients, including but not limited to the necessary consents for (i) the Program Patients to undergo Invisalign treatment provided by the University residents and faculty who have been successfully completed the Invisalign courses and (ii) the collection and use of any personal data of the Program Patients by a University resident and/or the University as well as the use and disclosure of such personal data by, and to, Align under this Agreement.
6. During this University Program, each University resident shall collect Initial records, 6 month progress reports, and final records (including but not limited to a minimum of extra and intra oral photographs, study models, and appropriate radiograph) at a quality level that can be used for presentation or publication purposes (the "Program Records"). Programme Records shall be sent to Align and may also be disclosed to Align's related subsidiaries. University hereby provides authorization for Align's use, on an anonymised basis, of such Programme Records without compensation to University or the Program Patient at its sole discretion for (i) educational and/or research and development purposes, (ii) orthodontic or dental consultations, (iii) publication in professional journals, books, or Align learning and marketing collateral. Prior to the release of Program Records to Align, University shall obtain Program Patients' signed and informed consent in respect of Align's processing of their personal information using the Program Patient Consent Form attached as Schedule 1. All completed Program Patient Consent Forms shall be sent to the local Align Clinical Department. The University warrants that all personal information contained in the Programme Records provided to Align has been obtained with the Programme Patients' informed consent.
