The principal informed the details of patent regarding portable pressure regulator pump.

- > The present invention relates to the idea of using manually generated air pressure for use by Dentists in carrying out Dental Treatment.
- > It specifically relates to the development of portable pressure pump for use by Dentist by replacing the cumbersome compressor for carrying out treatments at large scale in the rural and remote areas where electricity is not available.
- > This idea can be successfully used in community oral health programmes. Registration was made in September 2017 and was published in Indian Patent Journal during the same year and patent was granted in November 2021.

The members appreciated the activities of the College and congratulated the Principal, Faculty, staff and students for their active participation.

The members suggested that The Principal & team of faculty can visit a well known Dental College affiliated to a State University to review the facilities and other good practices.
