CAMP DETAILS

Rehabilitation of Mucormycosis patients in a camp organized by Indian Prosthodontic Society, Bengaluru Branch in association with Bowring and Lady Curzon Hospital Bengaluru between December 6th 2021 and January 4th 2022

Number of patients treated:

Eight

Teaching Faculty Involved:

Dr N Kalavathy

Dr M Mitha Shetty

Dr P Roshan Kumar

Dr Archana K Sanketh

Dr Anuradha V

PG Students Involved:

Dr Rutuja

Dr Ramyashree

Dr Harshita

Dr Karthiban

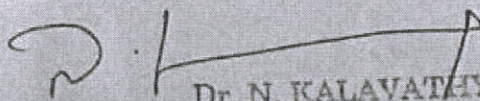

Dr Gayathri

Dr Bhuvana

Dr Anitha

Report:

Department of Prosthodontics, D A P M R V Dental College was involved in organizing a camp for Rehabilitation of mucormycosis patients which was a post-covid complication. The IPS Bengaluru Branch in association with Bowring and Lady Curzon Hospital Bengaluru were the primary organizers. Our seven post-graduate students were accompanied by Dr M Mitha Shetty and Dr P Roshan Kumar to Bowring Hospital and made primary impressions for all the eight patients. All the eight patients were referred to our institution for further procedures to complete the prostheses. The treatment was done free of cost by our institution. In the college, the work was supervised by all the teaching faculty. On 4th January the post-graduate students along with Dr Mitha went to Bowring and Lady Curzon Hospital Bengaluru and inserted the prostheses for all the patients and post-insertion instructions were given. Certificates were also issued to all the participants.

Public Health Dentistry

Feedback from UG student

- Camp was a really new and different experience for all of us.
- We explored the various ways of managing, arranging a camp, about the culture and facilities available at the site. Looking forward for more such chance.

Feedback from PG student

- Well organised camp
- Number of patients were very less.

Feedback from faculty

The camp was an opportunity to enhance our collaborations with Peoples Trust Sriramanahalli. Mr. Harish Uthais, Mr. Ramaswamy, Mr. Prakash and I, had fruitful deliberations regarding the restarting of camps. We screened the 12 faculty who were on campus on the day of the camp.

Feedback from UG student

KSRTC camp was well supported by the organizers. Experience was great and useful. Looking forward to more camps like this.

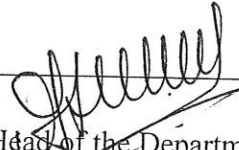

Feedback from PG student

Feedback from faculty

KSRTC camp is being planned for every tuesday of the week. With a fixed schedule & wider publicity, the number of beneficiaries is expected to increase.

Infection control protocol in outreach program

The following protocols have to be followed for infection control measures and operator and patient safety in the outreach programs.

General infection control protocols

1. All equipment to be sterilized with autoclave only to be used for patient screening and treatment.
2. Since hot water steriliser and cold sterilisation will not effectively reduce all microbial load within the short duration of time available at camp site, the camp in charge faculty should ensure that no non- autoclaved equipment are used for patient treatment.
3. All care providers (dental assistants, faculty and trainee dentists) to wear appropriate PPE and follow universal precautions for providing care.
4. Screening to be done in an open area.
5. All patients should rinse their mouth with chlorhexidine rinse, should be compulsorily masked and wear gloves, prior to screening and prior to treatment. Patients should wash/sanitize their hands. Clinical triage should be done (symptoms/travel history, temperature reading, contact with covid positive individuals, vaccination status)
6. All aerosol procedures (restorative care, oral prophylaxis etc) should be done
 - i. Only on patients with covid negative certificate, not less than 48 hours old.
 - ii. In open areas, using portable equipment.
 - iii. Completely avoided in the mobile van.
7. Non – aerosol procedures for providing caries preventive care to be provided in an open environment with a minimum of 12 feet spacing between patients.

PPE prescribed:

1. For screening – N 95 Masks, Face shield, Double gloves. Gloves to be changed for every patient compulsorily
2. For aerosol and non aerosol procedures – N 95 masks, Face shield, Doctors gown, double gloves.
Ensure that gloves are changed for every patient. N95 mask and doctors gown to be changed every 4 hours. Face shield to be disinfected every 2 hours.
3. For patients – Patient drape.

Disposal of biomedical waste:

1. The PPE wearer (Dentists/technicians/ assistant) is responsible for ensuring appropriate and safe disposal of the biomedical waste.
2. The used PPE is to be disposed in the designated bin, located at the camp site.
3. N95 masks and face shields are to be individually carried by the respective user in a paper cover and ziplock cover and subsequently disinfected back in the institution.

The biomedical waste generated at the camp should be carried back for safe disposal in the institution. The Biomedical waste should be carried in the Biohazard safety bags.

Public Health Dentistry

Feedback from UG student

- The camp was organized by the Public Health dentistry dept. and just like the dept, this camp was highly organized. It helped me learn patient management, communication skills and team work. I look forward to come on more such camps. Thankyou! - Dr Vasunelhar

Feedback from PG student

- It was a well organized camp. It helped me to improve my Organizational & leadership skills. I would wish to attend more camps in future → Dr. Kanaka K.M.

Feedback from faculty

Camps at KSRTC Training Centre have made a decent beginning. From previous camp to now, there has been a 4 fold increase in patients. These numbers will go up in the coming months as word of mouth appreciation spreads.

Infection control protocol in outreach program

The following protocols have to be followed for infection control measures and operator and patient safety in the outreach programs.

General infection control protocols

1. All equipment to be sterilized with autoclave only to be used for patient screening and treatment.
2. Since hot water steriliser and cold sterilisation will not effectively reduce all microbial load within the short duration of time available at camp site, the camp in charge faculty should ensure that no non- autoclaved equipment are used for patient treatment.
3. All care providers (dental assistants, faculty and trainee dentists) to wear appropriate PPE and follow universal precautions for providing care.
4. Screening to be done in an open area.
5. All patients should rinse their mouth with chlorhexidine rinse, should be compulsorily masked and wear gloves, prior to screening and prior to treatment. Patients should wash/sanitize their hands. Clinical triage should be done (symptoms/travel history, temperature reading, contact with covid positive individuals, vaccination status)
6. All aerosol procedures (restorative care, oral prophylaxis etc) should be done
 - i. Only on patients with covid negative certificate, not less than 48 hours old.
 - ii. In open areas, using portable equipment.
 - iii. Completely avoided in the mobile van.
7. Non – aerosol procedures for providing caries preventive care to be provided in an open environment with a minimum of 12 feet spacing between patients.

PPE prescribed:

1. For screening – N 95 Masks, Face shield, Double gloves. Gloves to be changed for every patient compulsorily
2. For aerosol and non aerosol procedures – N 95 masks, Face shield, Doctors gown, double gloves.
Ensure that gloves are changed for every patient. N95 mask and doctors gown to be changed every 4 hours. Face shield to be disinfected every 2 hours.
3. For patients – Patient drape.

Disposal of biomedical waste:

1. The PPE wearer (Dentists/technicians/ assistant) is responsible for ensuring appropriate and safe disposal of the biomedical waste.
2. The used PPE is to be disposed in the designated bin, located at the camp site.
3. N95 masks and face shields are to be individually carried by the respective user in a paper cover and ziplock cover and subsequently disinfected back in the institution.

The biomedical waste generated at the camp should be carried back for safe disposal in the institution. The Biomedical waste should be carried in the Biohazard safety bags.

Feedback from UG student

Diksha.

Camp was fine, but lacked enthusiasm due to lack of patients. The Putams were idle as not much crowd was present >

Feedback from PG student

Dr. Kanaka.

- The camp was poorly organized and not many patients came for screening and treatment, Should plan for the better camps.

Feedback from faculty

Camp went well. However the number of patients was very poor due to festival season.

Any other detail which needs to be added:

K.A: Dr Tyoban - Pls report about Shringar Camps. & make Conclusions to expand the same. Pls work towards adequate number of patients.

Public Health Dentistry

Feedback from UG student

Very useful and busy camp, we got exposure to lot of patient, well Organised camp set up which made our work comfortable and supportive environment - Dr. Kampa (Intern).

Feedback from PG student

Feedback from faculty

Dr. Vinodhini

Well organized camp; lot of pt, Most of them required secondary & tertiary prevention.

Any other detail which needs to be added:

1. Need for head lights → K.A. Dr. Tyolani For kind needed
 2. Display boards like Screening Station, Scaling station etc.
 3. ~~Water~~ water line needs to be checked.
4. separate space to document oral cancer cases or special cases in the report.
