QuikIrn

VERSATILE LEARNING PLATFORM

Get Cloud-based, data-driven and AI-powered learning services for your learners.

★ **Cloud-based** learning services provide anytime anywhere access of the courses. The mobile users can access the content while being on the move at the point of need.

★ **Content Store** provides a respository for all learning material organized based on relevance and selected courses. This also stores e-books (free and paid) from publishers which are accessible based on licensing.

Personalization feature has a rich set of functions that saves the preferences of the learner. Learners can create their

★ learning paths by adding notes, weblinks, tags, images, documents, and embed them into the courseware from multiple sources, including social media applications.

Assessment features help to measure the effectiveness of learning. Learning assessments are non-graded assessments that are part of the content packs and

★ configurable with guidance for the correct answer. Performance assessments are graded and integrated with the certificate generator.

Content Security The multi-tier encryption services at multiple levels (device-level, user-access, and licensing)

★ provide tamper-proof content security. The license manager of the Quiklrn platform manages the expiry period of the content and access rights.

Data Integrity The assessment system provides the complete audit trail of the assessment, response, and reviews of the assessments with the timestamps and user

★ detail. The training/course records of every individual maintained for audit, accreditation, and compliance purposes.
