50 responses

19. What percentage of teachers use ICT tools such as LCD projector, Multimedia, etc. while teaching.

50 responses

20. The overall quality of teaching-learning process in your institute is very good.

50 responses

21. Give three observation / suggestions to improve the overall teaching – learning experience in your institution.

18 responses

Need to improve in teacher student interaction

Student exchange programs needed

Basic life support classes needed

Field visits needed

1. More one-to-one interaction.
2. Hurrying the students during first clinical posting to complete their quota and not postpone much till the second posting.
3. More strict internal assessment evaluation and invigilation.

Please cover all the syllabus and procure correct syllabus sheets from university.

We need proper teaching of every topic and not name sake discussions. We thoroughly enjoyed the year. Please remind us of quota from beginning of year and do not rush us in the end to pressurise us.

few subjects portions wer not finished so that should be done properly.

More student centered approach required. Emergency management skills or other soft skills or field visits are not encouraged. Exams and marks shouldn't have to be the one goal.

More field visits will be really helpfull.

Inter college seminars

Student counselling (emotional n mental) is very important as i myself feel sometime emotionally n mentally stressed n tghere is not really many ppl i can talk to...so a student counsellor should be apointed

Teachers should not be biased towards students. It would be nice if teachers could agree to that the quota is not the ultimatum. Overall teaching is quite good.

1. The teachers are always punctual and make sure that students are punctual too
2. They make sure that you finish your quota no matter what before the exams
3. Help in developing communication skills

The teachers can have more interactive sessions in the class to break the monotony.

Explain the concept in more simpler terms.

Discuss important clinical aspects on a topic

- 1) Please keep materials in adequate supply. Over the past six months, there has been a material deficit in some departments.
- 2) Give PPEs to all students working in the clinics irrespective of the year of study they belong to.
- 3) Encourage students willing to go out of their way and work extra. Create a conducive environment for such students who make an effort to learn more.

A. Departments such as Cons and Endo could provide more help in final year rather than only in second year. There was a lot that I feel I could have grasped better with a few subjects, if I was subjected to a different learning process.

B. Classes for soft skills may help in overall development and help us in becoming better doctors, not just

clinical knowledge.

C. One on one sessions with students may help identify their weaknesses.

- 1.learning by doing
- 2.more field visit programs
- 3.they conduct class test also which is very helpful

Can actually use chalk and talk

More emphasis can be given on improving clinical skills

It's best in it's teaching and all other activities...it's a correct foundation to build a very good life

Incorporating video forms of teaching may improve learning.

More time on topics which are quite tough.

Repeation of few topics..
