Respected Madam,

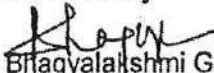

The program "Jagriti - Foundational Course for clinical care" was conducted from 5th December 2022 to 7th December 2022 followed by the White Coat Ceremony on 7th December 2022. We wish to thank you for supporting the Health Professional Unit in successfully conducting this program. A total of 65 Undergraduate students and 20 PG students benefited from the workshops.

The "Jagriti - Foundational Course for clinical care" program aims towards capacity building of our undergraduate students as they enter the clinics. This year, the Jagriti program trained the students in various important skills through Workshops on Ethics and Professionalism, Sterilization & Infection Control Practices, Prescription Writing and Communication Skills.

The Workshops were designed using the Kern's 6 steps of curriculum development, spread over 15 hours for 2.5 days from 5th December to 7th December 2022. The feedback and evaluation received from the undergraduate students indicate that the workshops were successful in instilling the core values of professionalism, skills of communication, fundamentals of sterilization and infection control practices and prescribing medications to patients. The 2.5 day program concluded with the White Coat Ceremony where students expressed their feedback on the training received and took the hippocratic oath.

The detailed reports of the workshops are attached along with the relevant photographs. We once again thank you for your constant support for the activities of the Health Professional Education Unit.

Yours Sincerely

## Advantages of Primary Implantation

- ◆ Generally preferred in Patients with Tumors
- ◆ Also can be done in Patients with Malignancy, but enough time should be given for Integration before subjecting them to Radiation
- ◆ The best access to the Neo Mandible is achievable at the time of Reconstruction.
- ◆ The ability to assess Ridge adequately for accurate Implant placement and Inter Arch Distance.
- ◆ Conversion to a Two stage procedure instead of Three staged
- ◆ Early Dental Rehabilitation will encourage early Speech and Swallowing there by reducing Psychological impact on the patients

## 10 TIPS FOR SUCCESS DURING VIVA

### Smart preparation:

- Don't try to revise everything prior to the viva voce, as examiners can ask from any area of pediatric dentistry, from history to the current scenario.
- Try to compile all your learning and experience over the three years and manage. Prepare better on 2-3 topics other than the clinical case scenarios, with good literature backup.
- You would be fortunate if you were asked to pick your favored topic.

### Reading Comprehension Strategies

<b>Re-read the Text</b> more information = more understanding	<b>Activate Prior Knowledge</b> what do I already know about this?	<b>Use Context Clues</b>
<b>Infer Meaning</b> read between the lines	<b>Think Aloud</b> talk through it	<b>Summarize the Story</b> Characters ↳ Setting ↳ Problem ↳ Solution
