By collaborating with us rest assured we will be providing total end to end support for your technicians and move your lab to the next level. From utilizing the latest materials and technology to training your staff you can count on our support in totality. We will be completely augmenting your lab.

PFM RESTORATION: We will be providing laser printed copings made of "Chrome Cobalt". This manufacturing process is a 3d printed additive manufacturing process done layer by layer, is of unappalled excellence in terms of fit, accuracy and margins. The repeat work is almost negligible. All the disadvantages and laborious casting of the banned Ni-CR work will be totally negated. 80% of the problems exist when you make nickel chrome out of casting, shrinkage in the casting, defective wax pattern, casting irregularity, irregular thickness. Your technician can concentrate solely on his layering work and deliver high quality restorations layering porcelain, EX-3 from Noritake will give excellent finish, easy manipulation, Noritake glaze to be used for high quality finish.

ALL CERAMIC ZR RESTORATIONS: We use the best of the machinery. Design is done in our centralized design center using best of scanner from 3 Shape each design is supervised verified by our qualified Prosthodontist. In short, this is one of the best design center in the country to produce zero defect crown. 3D milling 5 axis subtractive manufacturing process. Please note this is a completely automated digital manufacturing process where the anatomy and design are machine made. So, in terms of fit margin and shape this is the best we can achieve with no human skill required. So, the technician has to only polish and glaze the final product. The material used is a high strength multi-layered multi-coloured diamond zirconia. The finish is equal to any of the best lab in the world.

Alternatively, Zr coping will also be provided which can be layered in your in-house lab using CZR porcelain from Noritake, one of the best porcelain for zirconia layering because they were the first to produce zirconia and layering material.

HIGH END ZR CROWN AND BRIDGE KANTANA OF NORITAKE, JAPAN WILL BE TOTALLY DESIGNED, DEVELOPED AND MILLED AS EXPLAINED EARLIER THE HIGHEST QUALITY WITH REGARDS TO FIT, MARGIN, OCCLUSION, PROXIMAL SURFACE, COLOUR CONTRAST WILL BE MAINTAINED, WE SINTER IT AND GIVE IT TO YOUR LAB WHO INTURN WILL POLISH, STAIN IF REQUIRED, GLAZE IT. ALL THE MATERIAL REQUIRED FOR FINISHING OF THIS LIKE POLISHING DIAMOND PASTE, STAIN AND GLAZING MATERIAL WILL BE PROVIDED BY US, THERE ARE ALL NORITAKE MATERIAL WHICH WILL GIVE THE BEST FINISH IN THE WORLD.

GLASS CERAMIC: With our technical support your lab can have a faster turnaround time by delivering the crown the same day. Our state of the art wet milling machines will be at your exclusive service to produce these glass ceramic crowns. Your in-house lab has to only do crystallization, glazing and finishing. This will be the product for cosmetic value equivalent to the best crown produced by any lab in the country.

3D MODEL PRINTING SERVICE: If you send us a digital file through Intraoral scanner, we will be happy to print the digital model and manufacture the work.

CAST PARTIAL DENTURES: We provide this exclusive service by collaborating with your professors where we will digitally design and send for approval. We can print this in both titanium and chrome cobalt. After providing cast partial frame acrylicization of the teeth can be done by your technician in the college.

IMPLANT GUIDES: Over the years we have been recognised all over India to provide lab service for an excellent implant guides.

CONFID ALIGNERS: These are most sophisticated economic aligners in the market. We use state of the art 3D resin printers. We will be happy to coordinate with your orthodontic department to deliver the same.

Sir, you must recognize your technician for excellent work. When you join hands with us their work becomes minimum and quality will improve drastically, you also can provide them training in our in-house lab for all the work specially, layering technique, polishing, staining technique, glazing. With our training and his skill, he can provide excellent product on par with any of the best lab. Our request is to recognize him, encourage him, convert him as a great technician. You may also consider him for reward.

Staff supporting programme:

It is a fact that all the staff have their practice and majority of them are doing well. By establishing the college lab with our seamless digital support, you can extend your services to your own staff at very special rates and in this way, college can earn additional revenue.

Proposal: They can buy coping, full crown, cast partial from Confident dental lab.

Coping:

- a) Chrome cobalt
- b) Zirconia

For both layering can be done in the college by your excellent technician. For casting purpose, they buy coping from us, layering porcelain Noritake EX-3 will cost about Rs.90/- to 100/- per crown. It is an excellent porcelain, easy to manipulate, gives great finish, glazing also can be done with Noritake glaze. Technician can do only layering, finishing, glazing, college can charge Rs. 300 to 360/- for staff and for patients the management can fix any rates as desired.

In this way, it is beneficial for staff and college also will also get revenue, one technician per day can do 15 to 20 layering.

CONFIDENT DENTAL LAB PROPOSAL FOR CO-OPERATION WITH DENTAL COLLEGE

Dear,

The Principal

Greetings from confident dental laboratory Pvt Ltd. we are pleased to inform you that we have set up a State-of-the-art 3d printing and milling service pan India. We are very happy to collaborate with you.

In this collaboration we will be glad to help you adopt a complete digital work flow. With our centralized design atelier and state of the art mills we will be giving you a complete end to end digital solution from 3d scanning, designing, milling zirconia, printing SLM from our end.

We offer following of services.

- Laser printed chrome cobalt coping and long span bridge for layering porcelain.
- Laser printed chrome cobalt full metallic crown.
- Katana zirconia of Noritake multi colour, multi-layer for esthetic crown and bridge.
- Diamond zirconia monolithic coping for layering technique.
- Diamond multi colour, multi-layer full crown of Vita Shade for anterior and posterior crown and bridge.
- Lithium Di Silicate (glass ceramic) OEM material crown and bridge.
- Glass Ceramic (E-max) from Ivoclar for highly esthetic crown and bridge.
- 3D printed chrome cobalt cast partial denture
- Confi Aligner for orthodontic treatment.
- Implant specific guides
- Full denture with Ruthinium teeth Acry Lux (3 layer), Acry Plus (4 layer) and Ruthinium dental base material.
- Removable orthodontic appliance.

With these range of services, we are very happy to collaborate with you.

In this collaboration we can offer a standard flat rate for the institution for 3d printed coping and milling works and other substructures.

We currently make use of the best machinery with globally accepted standard materials like Sandvik UK for chrome cobalt metal printing, (CO-CR this a great alternative to Nickel Chrome which is known to be a contact allergen and banned all over the world), Noritake Katana Japan for full contour Zirconia milled crowns and also Diamond OEM zirconia coping for porcelain layering.

Diamond multi layer, multi colour for full crown and bridge for both anterior and posterior.

With this back-end support we believe you can operate a separate state of the art ceramic lab in your institution, with a ceramic furnace and trained ceramist only. You can invest only on ceramic division of the lab as per the statutory requirements, and develop an independent functional in-house lab business catering exclusively to your patients rather than outsourcing the complete work.

To help you get acquainted to the digital work flow, on a trial basis we will be deploying Intra Oral Scanner in your respective department with an in-house product specialist who will be training all your faculty members and Post graduates' students.

By adopting this strategy of partnering with us not only you are foraying into the field of digital dentistry but also providing your patients top class restorations in terms of safety, precision and fit in faster turnaround time. We also offer an extended range of services from our centralized lab headquartered in Bangalore. We have enclosed a brochure to showcase our range of services for your kind perusal.

The proposal what we would like to extend is a flat rate on all our products which is 30-40% less than the existing market rate. we will collaborate as lab-to-lab business only. you can function as an independent ceramic dental lab, and you can quote your institutional prices to the patient. As mentioned above we will charge you only for the substructure.

In case of full crown – It is only polishing material **Noritake Diamond** paste and **Noritake** glazing required to be done in the institutional lab.

- Glazing material may not cost you more than Rs. 20 to 30/-.
- One technician can polish and glaze up to 40 to 50 crown,
- This also you can charge upto Rs. 200/-.
- This is not tricky work.
- It is a smooth work and easy work.

College lab will therefore be executing work for both patients and job order of staff, ultimately developing revenue for college.

All the charges mentioned above are approximate. You can take your own decision.

In future if you want to adopt a complete digital system like 3D milling and scanning, we will be more than happy to install the machinery, train your technician and staff and support you any time with complicated design. We can stand by you for each and everything.

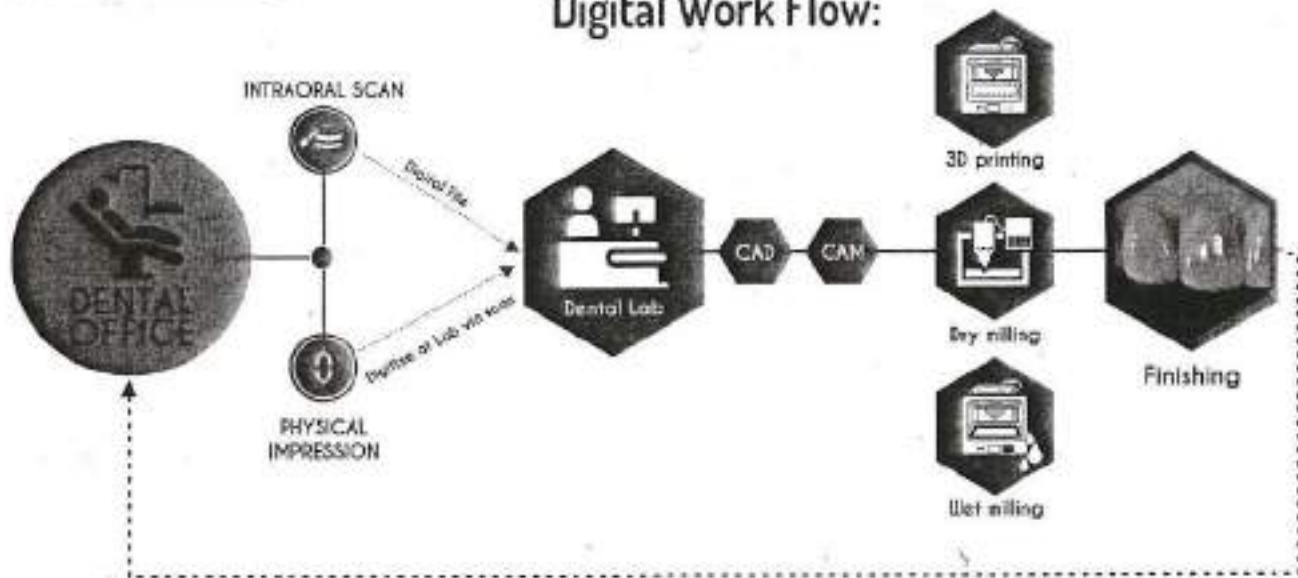

Looking forward for this partnership

About Youth for Seva

Youth for Seva (YFS), founded in April 2007, is a nation-wide volunteering movement that inspires youth to volunteer, and provides them with meaningful opportunities to serve the community.

The goal of YFS is to support schools, destitute shelters, government hospitals and other organizations in the social sector through volunteers who can help them mitigate some of their shortcomings and challenges. Volunteering is made easy and customized to the individual's interests, time availability and skill sets.

YFS aims to create positive change agents in the society, through the culture of volunteering.

(First Party and Second Party are hereinafter jointly referred to as 'Parties' and individually as 'Party') as

WHEREAS:

- A) First Party is a Higher Educational Institution named: **D.A Pandu Memorial R.V Dental College**
- B) First Party & Second Party believe that collaboration and co-operation between themselves will promote more effective use of each of their resources, and provide each of them with enhanced opportunities.
- C) The Parties intent to cooperate and focus their efforts on cooperation within area of Community Services.
- D) Both Parties, being legal entities in themselves desire to sign this MOU for advancing their mutual interests.
- E) – **YOUTH FOR SEVA**–, the Second Party is engaged in Skill Development, Volunteerism and Community oriented services - and related fields.

NOW THIS MEMORANDUM OF UNDERSTANDING WITNESSETH AS FOLLOWS

A. Joint Responsibility

1. Cooperation: Both Parties are united by common interests and objectives, and they shall establish channels of communication and co-operation that will promote and advance their respective operations within their related constituents. The Parties shall keep each other informed of potential opportunities and shall share all information that may be relevant to secure additional opportunities for one another.

General terms of co-operation shall be governed by this MOU.

The Parties shall cooperate with each other and shall, as promptly as is reasonably practical, enter into all relevant agreements, deeds and documents (the 'Definitive Documents') as may be required to give effect to the actions contemplated in terms of this MOU.
