## Advantages of Primary Implantation

- ◆ Generally preferred in Patients with Tumors
- ◆ Also can be done in Patients with Malignancy, but enough time should be given for Integration before subjecting them to Radiation
- ◆ The best access to the Neo Mandible is achievable at the time of Reconstruction.
- ◆ The ability to assess Ridge adequately for accurate Implant placement and Inter Arch Distance.
- ◆ Conversion to a Two stage procedure instead of Three staged
- ◆ Early Dental Rehabilitation will encourage early Speech and Swallowing thereby reducing Psychological impact on the patients
